## **Hot Foil Printing - Imperial Marking**

for Wire and Cable

The Taymer HF500 Hot Foil Printer is designed for printing in two foot intervals.

The Taymer 6-digit sequential counter is standard on the HF500 printer. Its industry leading design minimizes maintenance requirements. The tape management system is capable of producing clear, durable legends at speeds of up 600 ft/min.

The ease of operation and setup reduces scrap, production delays and the risk of damage to delicate communication and fiber optic cables. The HF500's robust construction and extra cable guides ensure consistent, high print quality on even the most rigid power cables.

The HF500 includes many cost saving features such as tape save, unique legend design, precise heat control and external length measurement.
