

FOR WIRE, CABLE, PIPE AND TUBE

› Clear print at high speeds

The Taymer HF100 hot foil printer is the entry-level model for wire, cable, pipe, and tube manufacturers. The Taymer 6-digit sequential counter is standard on the HF100 printer. The printer produces clear, durable legends at high line speeds with its tape management system.

› Easy to set up and use

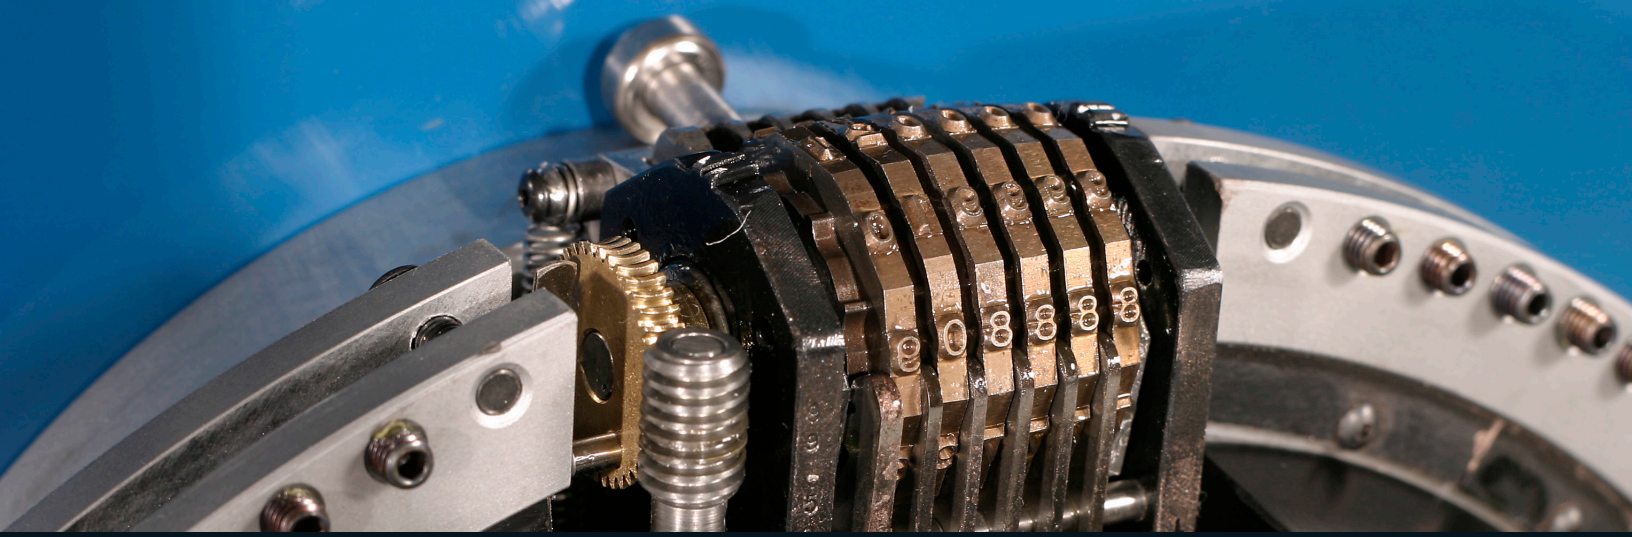

The ease of operation and setup reduces scrap, production delays, and the risk of damage to your cables. The HF100's robust construction ensures consistent print quality.

› Cost saving features

The HF100 includes many cost-saving features including tape save, unique legend design, precise heat control, and pushbutton counter reset.

FEATURES

- › Accurate sequential marking in meters or feet
- › Pushbutton, on the fly counter reset
- › Cost efficient legend segment mounting system
- › PLC control system reduces and simplifies maintenance requirements
- › Spring-loaded guide rollers allow trouble free passage of cable bulges
- › Casters provide easy movement in and out of the line
- › Rugged, heavy duty construction for the production environment
- › Single jumbo tape spool and accumulator minimizes tape brakes

SPECIFICATIONS

- Maximum print speed:
100 m/min | 300 ft/min
- Cable diameter range:
5 mm to 125 mm | 0.2" to 5"
- Drum drive:
Direct drive
- Compressed air:
80-100 PSI, dry
- Legend height:
0.0625" to 0.3" | 1.6 mm to 8.0 mm
- Print interval:
1 m or 2 ft
- Jacket materials:
Most common jacket materials
- Power requirements:
208 - 240 VAC 16A, single phase, 50/60 Hz
